

USER MANUAL

Thanks for choosing GOOLOO GE2000 smart car jump starter. Please read the user manual carefully before use and keep it for further reference.

A. CONFIGURATIONS

1. Power switch
2. Electricity indicator
3. Type-C Input port
4. 5V/9V/12V Quick-charge output
5. 5V/2.4A output
6. LED Flashlight (Strong, Strobe, SOS)
7. 12V Jumper cable interface
8. Compass

B. ELECTRICITY INDICATORS

Press the power switch, the indicators will show electricity as follows:

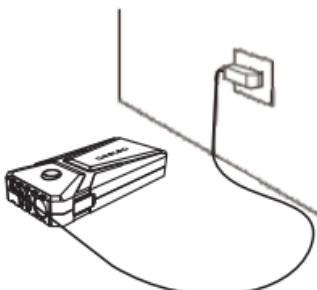

Indicators	0	1	2	3	4
GE2000 Electricity	0%	25%	50%	75%	100%

During charging, the blinking light indicates how much electricity has been charged.
And all lights will go off when it is fully charged.

C.INSTRUCTIONS

Steps To Recharge The Unit

1. Connect the wall charger with the unit.(Note: Wall charger not included)
2. Plug the wall charger into your universal output socket (100-240V).

How to Use the Smart Cable

1. First, plug the blue connector of the intelligent battery clamp into the main unit, ensuring that the clamp's indicator light is off.

2. Next, correctly connect the battery clamp to the positive and negative terminals of the car battery. Attach the red clamp to the positive terminal (+) and the black clamp to the negative terminal (-).

3. Then, follow the corresponding operation based on the battery clamp's indicator light:

Solid green light: This indicates that the connection is correct and powered on. You can now proceed with the emergency jump-start.

Solid red light: This indicates that the positive and negative terminals are incorrectly connected. Please reconnect them correctly, and once the green light turns solid, proceed with the emergency jump-start.

Flashing green light: This indicates that the battery voltage is too low. Press the BOOST button, and once the green light turns solid, complete the jump-start within 30 seconds.

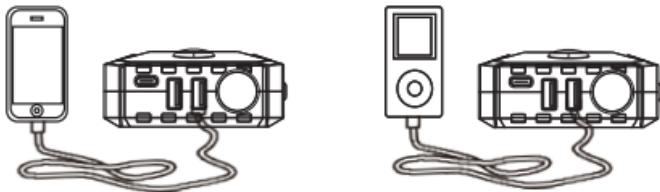

No red or green light: This may indicate that the battery is completely damaged. Ensure the positive and negative terminals are correctly connected, then press the BOOST button. Once the green light turns solid, complete the jump-start within 30 seconds.

Steps To Charge Your Electronics

1. Connect the type-a end to the quick-charge port of the unit.
2. Connect the other end to your electronics.
3. Press the power button, the unit will automatically detect the battery interior and delivery at the most suitable current, which is faster and safer.

Steps To Switch Light Modes

Press and hold the switch button for 3 seconds to turn on the lighting mode, and then each time you press it more, you can switch to flash, SOS, and finally turn it off.

③	Type-C USB Cable	1			

E. SPECIFICATIONS

Unit size: 6.69*3.25*1.34 inches

Unit weight: 0.99lb / 435g

Battery capacity: 37Wh

Output: 5V/9V/12V Quick-charge; 5V/2.4A, 12V Jumper cable interface

Input: 5V/3A Type-C input

Full charge time: 3~4 hours

Starting current: 300A (3S)

Peak current: 2000A

Operating temp: -20°C ~ 60°C / (-4 °F~140°F)

Product Highlights

Reliable Car Jump Starter

GOOLOO GE2000 has a peak current of 2000 A. 12V vehicles (6 liter petrol and 4 liter diesel) can be started in minutes. This includes cars, motorcycles, RVs, tractors, trucks and more. You can put the car's jump starter in the car for what the car needs.

Portable Emergency Car Start Power Bank

GE2000 Car Starter is designed with 2 USB outputs (5V/2.4A) and (5V/9V/12V). It can be taken anywhere and quickly charges many portable devices such as smartphones, tablets, Bluetooth headsets and more.

SAFE AND STURDY

The GE2000 smart jumper cable is constructed with an all-metal clip to prevent breakage during long-term use. And it has 10 kinds of protection such as over-current protection, over-load protection, over-voltage protection, overload protection, etc., everyone can use it with safety.

Lightweight and Stylish Design

The GOOLOO portable car starter battery pack is less than 1kg and measures 19.5cm x 12.5cm x 10.5cm (packaging box). You can easily hold it in your hand, or put it in your pocket, or place it anywhere in your car.

Built-in LED Flashlight

The flashlight can assist you in vehicle night emergencies, and the flashlight also has three other modes (SOS, Strobe and Emergency Light) to deal with other emergencies.

F.Q&A

- Q: How to turn off the jump starter ?
A: The product has a smart detection function. Once there is no load, or the electronic product is fully charged, it will automatically shut down and save the power to avoid loss.
- Q: How long does it take to fully recharge the GE2000?
A: Approx 3~4 hours.
- Q: How many times can this GE2000 charge a phone ?
A: Depending on the battery capacity of the cell phone. Taking iPhone8 as an example, it can be filled 6 times in a row.
- Q: How many times can GE2000 start cars after a full charge ?
A: Approx 20 times.
- Q: What's the service life of GE2000 ?
A: In normal use, it can work for 2~3 years.
- Q: How long can it keep charged while not using ?
A: The circuit design of the GE2000 is very scientific. It doesn't matter if it is not used for 6-12 months, but in order to extend the service life, it is recommended to charge it every three months.

G.TROUBLESHOOTING

Case	Cause	Solution
The GE2000 does not respond after pressing the power button	The circuits is cut off by self-protection because of its low voltage or overheat.	Recharge the unit until at least 3 lights are lit, or let it cool down for 10 minutes until the temperature is below 55°C before you can use it again.

H. TOXIC AND HAZARDOUS SUBSTANCES ILLUSTRATION

Toxic And Hazardous Substances Or Elements					
Pb	Hg	Cd	Cr (Vi)	PBB	PBDE
0	0	0	0	0	0

0: The content of this hazardous substance in all homogeneous materials of the component is below the limit requirements specified in the 2002/95/EC (RoHS) standard.

I.PRECAUTIONS

01. Please be cautious when using.
02. Please read the instructions carefully before use.
03. The product can only be used for starting 12V vehicles. It is prohibited to use it on equipment such as aircrafts and ships.
04. Please do not use it if the clamp or the unit has any damage.
05. Prohibit using it as a car battery.
06. Prohibit using it as a car battery charger.
07. Please remove the unit from your car battery in time after cranking your car successfully.
08. Please use the equipped jumper cables and other accessories come with it only.
09. Please make sure that the blue end of the jumper cable is fully inserted into the jumper cable interface, otherwise, the blue end may melt.
10. Before use, make sure all battery connectors are clean and the clamps are connected right. If the battery poles are dirty or corrosive, the start-up performance of the product will be reduced.
11. Please do not start the product more than three times in a row, as this may cause the product to overheat and be damaged. If you need to start the product several times, please wait two minutes between each startup.
12. Please remove the product from the car battery within 30s after use, or it may cause damage.
13. Do not connect the positive and negative terminals together when the power is on.
14. Please make sure that at least 3 lights are lit before use.
15. Please keep this product away from children.
16. Do not play it as a toy.
17. Do not wet the product.
18. Do not immerse the product in water.
19. Do not operate the product in an explosive atmosphere like the presence of flammable liquids, gases or dust.
20. Do not remodel or disassemble the product. Only professional technicians are allowed to repair.
21. Do not expose the product to extreme heat or fire.
22. To avoid the risk of short-circuiting caused by metals falling into the hole, please remove your jewelries such as rings, bracelets and necklaces before using the product.
23. Do not drop the product. If the product is impacted or damaged, it must be tested by a qualified battery technician.
24. Do not place the product in an environment where the temperature exceeds 70°C.

25. Please charge at room temperature not exceeding 60°C.
26. Do not start cars while charging the unit.
27. If the host leaks, please immediately recycle it with proper equipment.
28. Under extreme conditions, battery leakage may occur. If the liquid comes out of the product, it cannot be handled directly by hand. In the case of skin contact, wash immediately with soap and water. If the liquid comes in contact with your eyes, rinse your eyes with cold tap water for at least 10 minutes and seek medical attention immediately.
29. Lithium-ion battery-based products should be disposed in accordance with local regulations at the end of their life.
